

HUBER et al., Ser. No. 10/775,097

REMARKS

Claims 1-29 are pending. Applicants have amended the language "in the range from 0 to 200 mbar" to "at up to 200 mbar" in claims 10 and 13. It is urged that such language overcomes any objection to 0 mbar not constituting a pressure drop. Applicants have made other amendments to the claims and specification as suggested in the Office action.
